DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, drawn to a device having memory region in which a memory cell array is formed of non-volatile memory devices, classified in class 257, subclass 316.

II. Claims 7-13, drawn to a method of manufacturing said device, classified in class 438, subclass 258.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case unpatentability of the Group I invention would not necessarily imply unpatentability of the group II invention, for example, the product as claimed can be made by another and materially different process for example, such device (nonvolatile memory device) could be made by materially different process, which does not necessitate the use of a second insulating layer between the second control gate and the semiconductor layer.

Because these inventions are distinct for the reasons given above and have acquired a separate status of the art as shown by their different

Art Unit: 2825

classification, the fields of search are not co-extensive, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claims 7-13 have been canceled.

Authorization for this election and subsequent examiner's amendment was given in a telephone interview with Mr. Jude Cooney, reg. No. 54,045 on May 14, 2004.

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art does not teach a semiconductor device having a memory region in which a memory cell array is formed of non-volatile memory devices and

Art Unit: 2825

wherein a second insulating layer formed of a silicon oxide film is disposed between the second control gate and the semiconductor layer, and

wherein the thickness of the second insulating layer is smaller than the thickness.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Yevsikov whose telephone number is (571) 272-1910. The examiner can normally be reached on Monday –Thursdays 8:00-5:30.
